- PhotoShop adjustment session after the photography ends (adjusting levels, sharpness, contrast, color saturation, conversion to B&W / sepia etc.).

### Advice on what to wear:

- **Children** - look best in layers and bright colors.
- **Couples** - try to stick to darker colors without bold patterns. It is very important that clothing doesn't detract from your facial expressions and body language.
- **Families** - see "children above". No white shirts please!! The human eye naturally is drawn to the brightest part of an image. With a family full of white shirts, the focus will be on the bright white shirts rather than the character in your faces. Rather than all wearing the same color, think about having a unifying color, where each member of the family can

be wearing a different shade or pattern (not bold) of that color. If you have young children, come prepared with ideas of games you can play with them, songs you can sing, etc.

- **Pets** I do on-location only, I want you and your pet to be as comfortable and relaxed as possible during our session. Usually the best location is at your home, but if you have another favorite spot and know your dog will be happy there, that's perfectly acceptable!
- **Props** - I can supply general props, but if you have particular items, hobbies, interests, that screams you or your family, let me know!
